

AUTOMATIC DOSING OF TREATMENT CHEMICALS

Automatic dispensing by weighing the concentrate

This system is an independent assembly permitting the automatic preparation of product for treatment. It presents the following advantages:

- Eliminates the risk of miscalculations in the preparation of products.
- System is compatible with all existing facilities and products.
- Mixes and transfers the product via a pump; no handling of product by hand
- Anti-overfill safety for transfer to the work tank.

SINGLE DISPENSING

IBC placed on a balance on a support structure.

Electric command and control box.

MULTIPLE DOSAGES

IBC and balances for the preparation of multiple components

STAND ALONE SYSTEM FOR PREPARATION, MIXING, AND TRANSFER

Dosing system driven by its own PLC with easy to use touch screen interface.

Mixing motor and transfer pump
